

STATUS OF THE CLAIMS:

Claims 33, 39, 45, and 51 are amended herein. The following is the status of the claims of the above-captioned application.

Claims 1-31 (Canceled).

Claim 32 (Previously added). A composition comprising:

- (A) a detergent effective amount of one or more surfactants; and
- (B) from 0.0001 to 2.5 percent by weight, based upon 100 percent by weight of said composition, of a fungal cellulase preparation, said fungal cellulase preparation comprising an endoglucanase, wherein said fungal cellulase preparation is free of cellobiohydrolase (CBH) activity.

C1 Claim 33 (Amended). A composition as defined in claim 32, having a pH ranging wherein the pH of said composition is from 3 to 10.

Claim 34 (Previously added). A composition as defined in claim 32, wherein said fungal cellulase preparation is homogeneous.

Claim 35 (Previously added). A composition as defined in claim 32, wherein said fungal cellulase preparation is produced by a genetically modified organism.

Claim 36 (Previously added). A composition as defined in claim 35, wherein said genetically modified organism is a fungus.

Claim 37 (Previously added). A composition as defined in claim 32, wherein said endoglucanase has a CMC-endoase activity of at least about 50 CMC-endoase units/mg of total cellulase.

Claim 38 (Previously added). A composition comprising:

- (A) a detergent effective amount of one or more surfactants; and
- (B) from 0.0001 to 2.5 percent by weight, based upon 100 percent by weight of said composition, of a fungal cellulase preparation, said fungal cellulase preparation consisting

essentially of an endoglucanase, wherein said fungal cellulase preparation is free of cellobiohydrolase (CBH) activity.

C2
Claim 39 (Amended). A composition as defined in claim 38, ~~having a pH ranging wherein the pH~~ of said composition is from 3 to 10.

Claim 40 (Previously added). A composition as defined in claim 38, wherein said fungal cellulase preparation is homogeneous.

Claim 41 (Previously added). A composition as defined in claim 38, wherein said fungal cellulase preparation is produced by a genetically modified organism.

Claim 42 (Previously added). A composition as defined in claim 41, wherein said genetically modified organism is a fungus.

Claim 43 (Previously added). A composition as defined in claim 38, wherein said endoglucanase has a CMC-endoase activity of at least about 50 CMC-endoase units/mg of total cellulase.

Claim 44 (Previously added). A composition comprising:

- (A) a detergent effective amount of one or more surfactants; and
 - (B) from 0.0001 to 2.5 percent by weight, based upon 100 percent by weight of said composition, of a fungal cellulase preparation, said fungal cellulase preparation consisting of an endoglucanase, wherein said fungal cellulase preparation is free of cellobiohydrolase (CBH) activity.
-

C3
Claim 45 (Amended). A composition as defined in claim 44, ~~having a pH ranging wherein the pH~~ of said composition is from 3 to 10.

Claim 46 (Previously added). A composition as defined in claim 44, wherein said fungal cellulase preparation is homogeneous.

Claim 47 (Previously added). A composition as defined in claim 44, wherein said fungal cellulase preparation is produced by a genetically modified organism.

Claim 48 (Previously added). A composition as defined in claim 47, wherein said genetically modified organism is a fungus.

Claim 49 (Previously added). A composition as defined in claim 44, wherein said endoglucanase has a CMC-endoase activity of at least about 50 CMC-endoase units/mg of total cellulase.

Claim 50 (Previously added). A composition comprising:

- (A) a detergent effective amount of one or more surfactants; and
- (B) from 0.0001 to 2.5 percent by weight, based upon 100 percent by weight of said composition, of a fungal cellulase preparation, said fungal cellulase preparation comprising one or more endoglucanases, wherein said endoglucanases have a CMC-endoase activity of at least about 50 CMC-endoase units/mg of total cellulase, wherein said endoglucanases do not degrade highly crystalline cellulose or cellobiose β -p-nitrophenyl, and wherein said endoglucanases degrade amorphous cellulose to a mixture comprising cellobiose, cellotriose, and cellotetraose.

CH
Claim 51 (Amended). A composition as defined in claim 50, ~~having a pH ranging wherein the pH~~ of said composition is from 3 to 10.

Claim 52 (Previously added). A composition as defined in claim 50, wherein said fungal cellulase preparation is homogeneous.

Claim 53 (Previously added). A composition as defined in claim 50, wherein said fungal cellulase preparation is produced by a genetically modified organism.

Claim 54 (Previously added). A composition as defined in claim 53, wherein said genetically modified organism is a fungus.
